Dear Ms Carpenter

TASMAN RESOURCES LTD (“the Company”) – PRICE AND VOLUME QUERY

We refer to your letter of 12 June 2014, and in relation to the questions raised by you concerning the recent increase in both price and volume of trading in securities of the Company during trading today, we comment as follows:-

1. *Is the Company aware of any information concerning it that has not been announced which, if known by some in the market, could explain the recent trading in the securities of the Company?*

No.

2. *If the answer to question 1 is “yes”:*

- a) *Is the Entity relying on Listing Rule 3.1A not to announce that information under Listing Rule 3.1?*
- b) *Can an announcement be made immediately?*
- c) *If an announcement cannot be made immediately, why not and when is it expected that an announcement will be made?*

If the answer to question 1 is yes, can an announcement be made immediately? If not, why not and when is it expected that an announcement will be made?

Not applicable.

3. *If the answer to question 1 is “no”, is there any other explanation that the Entity may have for the recent trading in its securities?*

The Company anticipates that the following factors have contributed to the increase in both volume and price:

- **On 5 June 2014, 1,202,668 shares were sold on the market pushing the price down from 2.1 cents each to 1.7 cents;**
- **On 6 June 2014 the Company made two announcements to the ASX in relation to:**

- The Company's 100% owned Vulcan IOCGU Project in South Australia in which announcement the Company advised that it had received expressions of interest from a number of larger mining houses in relation to further exploration; and

- The Company's 100% owned Parkinson Dam Epithermal Gold and Silver Project in South Australia in which the Company advised:

- A new epithermal gold silver target (approximately 18 km²) had been identified ;
- The target builds on recent epithermal discoveries by other companies (eg. 20Moz Paris silver discovery) and developments in regional geological understanding; and
- That the Company plans to follow up the target with surface geochemistry, and shallow drilling.

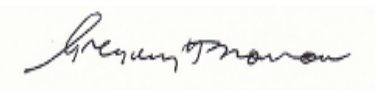

The second of these announcements was re-issued to the ASX on 10 June 2014 to include an additional statement required to satisfy the JORC Code

- The fact that the Company holds 349,301,142 shares in Eden Energy Ltd (EDE) which represent over 46% of the total issued capital of Eden Energy Ltd (and which are currently trading at approximately 1.4cents each) and that as the Company itself has 226,561,469 on issue, the Eden Energy shareholding that it holds represents approximately 1.54 Eden Energy shares for each existing Tasman share on issue.

4. *Please confirm that the Company is in compliance with the Listing Rules and, in particular, Listing Rule 3.1.*

The Company confirms that it is in compliance with the Listing Rules and, in particular, Listing Rule 3.1.

Yours faithfully

Greg Solomon
Executive Chairman
